Profile

Full Stack Developer with nearly 1 year of practical experience developing modern web applications using ReactJS, NextJS, JavaScript, TypeScript, NodeJS, ExpressJS, and NestJS. Skilled in building responsive and user-friendly interfaces with HTML and Tailwind CSS, developing RESTful APIs, and working with MongoDB, MySQL and PostgreSQL databases. Familiar with frontend-backend integration, database management, and building clean, responsive, and scalable web applications. Passionate about learning new technologies and contributing to real-world software development projects.

Professional Experience

MERN Intern

11/2025 – 08/2026

Enigmatix

Bahawalpur

- Contributed to the development and maintenance of full-stack web applications, collaborating with senior engineers to deliver scalable and reliable software solutions.
- Participated in application design discussions, progress demonstrations, and Agile ceremonies, working closely with cross-functional teams to deliver features on schedule.
- Assisted in developing and integrating APIs, implementing new functionality, and resolving technical issues to improve application performance and user experience.

Skills

Frontend

HTML5, CSS3, JavaScript (ES6+), TypeScript, ReactJS, NextJS, Redux Toolkit, Tailwind CSS, Bootstrap, REST API Integration, Server-Side Rendering (SSR), Static Site Generation (SSG), Client-Side Rendering (CSR).

Backend

NodeJS, ExpressJS, NestJS, RESTful APIs, Redis, OAuth 2.0, RBAC, Multi-Tenant Architecture.

Others

Git, GitHub.

Databases

MongoDB, PostgreSQL, MySQL, Supabase, Database Design.

Projects

PavilionCC

White-Label Sports Club Management System

- Developed a white-labeled, multi-tenant platform for sports clubs with customizable branding (dynamic logos and colors).
- Built the frontend using Next.js with TypeScript and Tailwind CSS for responsive UI design.
- Implemented the backend with NestJS using PostgreSQL on Supabase as the primary database.
- Enhanced performance with Redis caching and Bull queue processing for background jobs.
- Automated tasks with Cron services and secured authentication using Argon2 hashing.
- Documented APIs with Swagger for developer-friendly integration.

Facilifi

Asset Management

- Developed and maintained both frontend and backend components using React (with Redux) for UI /state management and NestJS for server-side architecture.
- Designed and implemented scalable RESTful APIs in NestJS to manage asset lifecycle operations (create, assign, transfer, retire).
- Structured and optimized MySQL database schemas for relational asset data, tracking logs, and user roles.
- Implemented Redis caching for high-performance data access and improved system response times for frequent queries.
- Integrated RBAC and multi-user workflows for Admins, Managers, and Technicians.

Education

BS Computer Science

02/2024 – 01/2028

The Islamia University of Bahawalpur
